Summary

Full-Stack Developer building and deploying production web applications used by 25,000+ users, specializing in Next.js, TypeScript, Supabase, PostgreSQL, real-time systems, and AI-powered applications.

Education

MIT World Peace University — M.Sc. Computer Science

Jul 2026 – Present

MIT World Peace University — B.Sc. Computer Science

Jul 2023 – Jun 2026

Specialization in Data Science & Big Data Analytics | CGPA: 8.31/10

Experience

Founder / Full-Stack Developer — SD Technologies

Jul 2026 – Present

- Founded and lead a software development company building scalable web platforms for institutions and businesses.
- Deliver end-to-end solutions across development, deployment, AI integration, and maintenance.

Software Developer — Registrar Office, MIT WPU (Part-Time)

Aug 2025 – May 2026

- Built and deployed **CampusBook**, a university infrastructure management platform optimizing resource allocation, scheduling, and utilization across academic departments.
- Developed role-based access, approval workflows, and real-time analytics enabling administrators to monitor infrastructure utilization and reduce scheduling conflicts and manual coordination.

Full-Stack Developer — Sports & IT Departments, MIT WPU (Part-Time)

May 2025 – May 2026

- Built and deployed **Courtside**, a sports operations platform serving 25,000+ users across MIT-WPU, digitizing facility bookings and sports administration.
- Integrated real-time synchronization, QR-based check-ins, and Generative AI support for bookings and live availability.

Projects

Courtside — AI Sports Facility Automation System

[Live](#) | [GitHub](#)

- Developed an end-to-end sports facility automation platform serving 25,000+ users, digitizing bookings, credit courses, attendance, gym management, analytics, and student engagement forums.
- Automated Dronacharya Sports Complex operations with real-time availability, QR-based check-ins, equipment distribution, reporting, and an AI assistant for bookings and live queries.
- Tech Stack:** Next.js, React, TypeScript, Supabase, PostgreSQL, Tailwind CSS, Generative AI, IoT, GitHub Actions

CampusBook — University Resource Management Platform

[Live](#) | [GitHub](#)

- Developed a campus-wide platform for planning, scheduling, and monitoring academic infrastructure with real-time availability, approval workflows, recurring bookings, and calendar integration.
- Provided administrative analytics for resource allocation, scheduling gaps, and underutilized infrastructure, reducing booking conflicts and manual coordination.
- Tech Stack:** Next.js 15, TypeScript, Supabase, PostgreSQL, Tailwind CSS, shadcn/ui, Framer Motion, Recharts

Digital ID — Digital Visiting Card System

[Live](#) | [GitHub](#)

- Built a digital visiting card platform for MIT-WPU employees with personalized profiles, QR sharing, vCard downloads, admin controls, and 3D interactive cards.
- Tech Stack:** Next.js, TypeScript, Supabase, PostgreSQL, Tailwind CSS, shadcn/ui, Framer Motion, Three.js, Vercel

Technical Skills

Languages: JavaScript, TypeScript, C++, SQL, Python

Frontend: Next.js, React, Tailwind CSS, shadcn/ui, Framer Motion, HTML/CSS

Backend: Node.js, Supabase, PostgreSQL, MySQL, REST APIs, Authentication, RLS

Realtime & Cloud: Supabase Realtime, WebSockets, Serverless, Edge Functions, Vercel

Engineering & Tools: System Design, API Design, Performance Optimization, Git, GitHub Actions, CI/CD, Figma
